* 2- Average autonomy with 3 batteries, depending on weight, slope, speed, road conditions.

- 3-max. range with 3 batteries, under ideal test conditions

A performance artist

Unique turns, super grip and powerful energy: shine with high quality sport tires, CBS equipment and a timeless design. Enjoy the speed of a car without giving up the agility, flexibility and absolute freedom of a two-wheeler. Travel through city and country roads and combine speed, temperament and style for the ultimate in driving pleasure.

Our small display (it's like a technician!)

The 7-inch touchscreen of our model 54i:gnite e-scooter always keeps you informed of the range, speed and consumption available. In addition, you can choose between four different driving modes - Sport, Comfort, Eco or Rain - depending on weather conditions and energy consumption.

There is also a telemetry module, built into the battery, which will provide valuable information on location and charge status to know exactly when it is necessary to recharge the scooter with an effective charge level and not an average estimate. . You also have the option to locate your Kumpan worldwide to find out exactly where your scooter is.

Drive safely all night long

Safety is our priority! We designed the turn signals, taillights, brake lights and above all the headlights to provide the best possible illumination with powerful HiPower LEDs to ensure you have a good view at night and be seen immediately by others.

Power Pack 2.0: the heart and soul of electric mobility

The power pack 2.0 is the heart of our scooters. Developed and produced by us, the batteries have been fitted with LG cells and, together with the incredible 7 kW motor power of the 54i:gnite model, they will guarantee reliable driving pleasure. Your Kumpan 54i:gnite is delivered with two "power packs 2.0". However, if you plug in a third battery, you can travel an average of 80 km and up to 110 km, depending on the load, weather and road conditions.

Performance data:

- Power: 7 kW
- brushless wheel hub motor
- Maximum power of 7,000 watts
- 141 Nm of torque
- Speed: 100 km / h
- Range of 80 km (with three batteries inserted)
- Maximum range: up to 110 km (under optimal test conditions)
- Battery: up to 3 removable lithium-ion batteries, 51 V, 28.5 Ah, 1.5 kWh / battery (no memory effect), battery charging option
