Description

ADDITIONAL OR REPLACEMENT CHARGER FOR YOUR SCOOTER BATTERIES

Emoblite Kumpan Canada drivers who are often outside with their E-Stop and therefore need to recharge their batteries might often find it convenient to get a second charger: This will dramatically reduce your wait time. You can plug in two batteries at the same time and don't have to wait for the first to be fully charged, so you and your Kumpan Canada Emoblite Scooter are back on the road even sooner!

Technical characteristics: - 48V / 18A, IC charger controlled with pulse width modulation (PWM) technology and IU charging method (CCCV)

Compatible with the Kumpan Canada battery of Emobility "Power Pack 2.0". If you are not sure if this item is compatible with your Kumpan Canada Emobility, please do not hesitate to contact us, we will be happy to assist you!
